

Vacuflow® Vacuum Sewer system

Recreation Area

Introduction

A recreational Camping park in Belgium.

This project is serving ± 2000 persons with a vacuum sewage system.

On the park are Bungalows, mobile homes, Camping Area, Tropical Swimming Pool and a Recreation Lake with Beach

Specification

The owner of this Camping park do the maintenance himself as also when he wants to extend his park he do the construction of the piping and place the interface pots himself. Since the interface pots do not need any electricity it is very easy to do the construction. In this way the system is very flexible and easy to change.

It give him the flexibility to reorganize his camping and place more mobile homes or bungalows with low investment costs.

Technical information

Vacuum pumps : 2 (liquid ring pumps)

Vacuum valves : ± 35
